

## MAGNET POUCHES

The best way to make professional magnets on demand is to create your own. Simply insert your printed image into the magnet pouch, then pass it through a heated pouch laminator to seal and your magnet is finished! Ideal for print shops, schools and home use.

**\$549.00 Pro Lam Ultra**

### Magnet Pouch Tips:

There are many types of pouch laminators in the marketplace, we recommend using a photo quality machine, consisting of six or more heated rollers and a speed adjustment. The laminator should be fully preheated at 230-250 degrees F. Set your speed to a slower setting, feed the magnet pouch into the laminator using the pouches seal as the leading edge, and the magnet pouch is ready for use.
